

REFIT Dataset

B1 B2 B3 B4

B5 B6 B7 B9

B10 B11 B12 B14

B15 B16 B18 B19

Training Process

Sample N building for
the current training
round

Send the global
model to each
selected client

Train for K_l local
iterations on
each client

Aggregate local
models and update
global model

Repeat for K_G iterations

Final Global
Model

Inference and
evaluation on each
building

F1-score

MAE
